Aaliya Bashir, MPA, PMP, CSM

Strategic Programs & AI-Enabled Operations Leader Technical Program Management | Enterprise Transformation | Platform Operations | AI Infrastructure

Atlanta, GA | bashiraaliya@gmail.com | +1-678-594-1031 | https://linkedin.com/in/aaliya-bashir/
Portfolio: https://bus-ops-deck.vercel.app Platform case study: https://aaliya-ai-ops-ecosystem.vercel.app

PROFESSIONAL SUMMARY

Strategic programs, technical operations, and AI systems leader with 16+ years of experience turning complex systems, data, and stakeholder needs into executable strategy, governed operating models, and measurable business outcomes. Experienced in technical program management, enterprise transformation, executive decision support, analytics, workforce and Total Rewards optimization, SaaS implementation, and cross-functional delivery. Built and installed an AI-enabled production platform integrating local AI, MCP integrations, APIs, Linux and macOS infrastructure, cloud services, remote access, automation, observability, CI/CD, storage, and recoverable service operations. Known for leading through influence, creating structure in ambiguity, communicating with executives, and translating technical complexity into practical organizational capability.

LEADERSHIP IMPACT

- Led a $4.5M academic medicine initiative spanning 10+ institutions, hospital partners, educators, and senior stakeholders.
- Directed $245K–$2.2M SaaS implementations for Department of Energy, defense, and regulated-industry clients.
- Developed a five-year operating and investment roadmap contributing to more than $14M in savings and cost avoidance.
- Led and developed a 17-member team while improving customer satisfaction by 34% within six months.
- Increased client satisfaction by 25% through stronger communication, delivery alignment, and issue-resolution practices.

CORE COMPETENCIES

- Strategic programs and enterprise transformation
- Technical program management and platform operations
- AI systems, automation, and responsible AI controls
- Agent orchestration, MCP integrations, and APIs
- Operating-model design, governance, and execution
- Executive decision support and C-suite storytelling
- Enterprise automation and systems integration
- Reliability, observability, and incident-readiness
- SaaS implementation and regulated-industry delivery
- Dashboard development, KPI design, and operational reporting
- Cross-functional leadership, stakeholder alignment, and change management
- Risk, dependency, escalation, and recovery management

PROFESSIONAL EXPERIENCE

Wellstar Health System, Atlanta, GA

Technical Program Manager - Total Rewards Jan 2025 – Jul 2026

- Led enterprise Total Rewards and Labor Optimization work by translating complex workforce, benefits, utilization, and labor data into executive dashboards, decision materials, and action-oriented recommendations.
- Designed analytics and storytelling frameworks connecting people-program investments to ROI, utilization, operational efficiency, workforce experience, and organizational value.

- Built repeatable reporting and data workflows using Power BI, Tableau, SQL, Excel, and PowerQuery, improving visibility and reducing fragmentation across stakeholder groups.
- Coordinated technical, operational, HR, finance, and leadership stakeholders to clarify requirements, resolve data ambiguity, and move high-priority initiatives toward execution.
- Served as the bridge between technical teams and executive audiences, converting complex analysis into clear decisions, priorities, risks, and next steps.

Harvard Medical School, Remote

Program Manager Jan 2023 – Jan 2025

Concurrent SME consulting engagement

- Led a $4.5M, multi-stakeholder academic medicine initiative spanning 10+ institutions, hospital partners, educators, and internal leadership groups.
- Established governance, operating rhythms, decision frameworks, communication plans, and execution milestones for a politically sensitive, high-visibility program.
- Balanced institutional strategy, long-range value creation, fiscal planning, stakeholder priorities, and operational delivery.
- Created structure across ambiguous workstreams, enabling senior stakeholders to make timely decisions and maintain execution momentum.
- Strengthened systems and workflows related to learning operations, curriculum mapping, and fiscal planning.

Ideagen DevonWay, Remote

Technical Project Manager Nov 2022 – Jan 2024

Concurrent SME consulting engagement

- Directed SaaS implementations for Department of Energy, defense, and regulated-industry clients with project budgets ranging from $245K to $2.2M.
- Owned client-facing program communication across scope, schedule, risk, dependencies, issue resolution, and executive status reporting.
- Coordinated sales, product, engineering, implementation, and customer teams across complex technical environments.
- Increased customer satisfaction by 25% by improving communication, delivery alignment, and issue-resolution practices.

Warrior Body Spa, Tucker, GA

Director of Operations 2014–2022

- Directed operations, systems, customer experience, staffing, process improvement, and performance management for a growing service business.
- Led and developed a 17-member team while improving customer satisfaction by 34% within six months.
- Redesigned CRM, scheduling, marketing, and service-delivery workflows to improve consistency, visibility, and scalability.
- Balanced daily operational execution with long-range planning, automation, employee support, and business expansion.

KSW Real Estate, Atlanta, GA

Project Manager, Real Estate Operations 2010–2014

- Developed a five-year operating and investment roadmap contributing to more than $14M in savings and cost avoidance.
- Supported portfolio expansion from two to seven properties, contributing to 350% portfolio growth through disciplined planning, financial analysis, and execution management.

INDEPENDENT PLATFORM ENGINEERING & AI OPERATIONS | 2023–PRESENT

AI-Enabled Operations Ecosystem | Atlanta, GA

- Designed, built, and installed a recoverable AI-enabled production platform integrating compute, networking, storage, remote access, security, observability, automation, CI/CD, cloud services, APIs, MCP integrations, and local AI.
- Architected distinct compute, network, data, security, automation, AI, and recovery planes across macOS, Debian Linux, Apple Silicon, Docker/Compose, Colima/Lima, PostgreSQL, Redis, Tailscale, Cloudflare Tunnel, self-hosted CI runners, and launchd-managed services.
- Built a guarded AI operations control plane that observes infrastructure, detects anomalies, evaluates risk, executes only registered policy-approved actions, records audit evidence, and fails closed when identity or approval controls are unavailable.
- Built and installed a production OpenClaw watchdog running through macOS launchd every five minutes, monitoring local and public health endpoints and applying a staged recovery sequence with persistent state, file locking, cooldown protection, and sanitized logging.
- Integrated Linux network infrastructure, Pi-hole, DNS, DHCP, SSH, Samba/SMB, NAS workflows, remote administration, cloud services, and private/public access boundaries into a recoverable operating model.
- Established operational standards through preflight checks, rollback procedures, backup/restore requirements, runtime verification, storage monitoring, soak testing, and evidence-based health classification.
- Built supporting AI and automation systems spanning agent orchestration, enterprise workflows, healthcare operations, dashboards, APIs, developer tooling, and secure integrations.

SELECTED AI PRODUCT & ENGINEERING PORTFOLIO

- Mothership and BOOMERANG: Enterprise automation platforms involving agent workflows, approvals, permissions, audit trails, finance operations, revenue workflows, dashboards, and task execution.
- FHIR Facility Copilot and FlowTwin Live: Healthcare AI and real-time operations systems involving clinical workflows, patient flow, voice interfaces, APIs, dashboards, and live metrics.
- Dispatch Bot, CLAUDELITELLM, and ZeroWait: Agentic workflow automation, LLM routing, integrations, healthcare access, scheduling, and patient-flow product development.

TECHNICAL TOOLS

- Analytics: Power BI, Tableau, SQL, Excel, PowerQuery
- Program delivery: Jira, Confluence, Asana, PowerPoint, Visio, Agile, Waterfall
- AI and agent systems: OpenClaw, MCP, Ollama, LiteLLM, Llama.cpp, Claude, Gemini, tool calling, multi-agent workflows
- Software and APIs: Python, TypeScript, JavaScript, React, Vite, Node.js, Express, Bash, zsh, REST APIs, WebSockets
- Infrastructure and operations: macOS, Debian Linux, Linux, launchd, Tailscale, Cloudflare, Cloudflare Tunnel, Cloudflare Access, Colima, Lima, Docker, Docker Compose, Dockge
- Data and storage: PostgreSQL, Redis, SQLite, Samba, SMB, mergerfs, SnapRAID
- Delivery and source control: Git, GitHub Actions, GitHub CLI

EDUCATION & CREDENTIALS

- Harvard University, Graduate Certificate, Corporate Sustainability and Innovation
- Augusta University, Master of Public Administration
- Paine College, Bachelor of Arts, Philosophy
- Private Pilot License, ATP Flight School
- Certifications: Project Management Professional (PMP), Certified ScrumMaster (CSM)
